ULTRAFIT™

Product Care Guide

Windshield Protection Film

Your vehicle's windshield has been fitted with ULTRAFIT Windshield Protection Film (WinCrest).
Please follow the care instructions below to keep the film looking and performing at its best.

Important — Protecting Your Windshield

WinCrest acts as a protective layer on the windshield,
reducing the chances of the glass being damaged or cracked on impact.

1 72 HOURS After Installation

– WinCrest may take up to 72 hours to fully cure and bond to the glass.

Avoid Extreme Weather

Don't leave the vehicle exposed to extreme weather conditions during this period.

Avoid Rough Roads

Try not to drive on rough or unpaved roads while the film is still curing.

Avoid Car Washes

Skip commercial or automatic car washes until the 72 hours have passed.

2 General Washing

– **Regular Maintenance**
Clean your windshield with the materials below at least once a week, and rinse thoroughly afterward so no cleaning product residue is left behind.

CLEANING MATERIALS

Clean microfiber cloth, sponge, clay bar, or soft brush to prevent scratching.

Ammonia-free glass cleaner.

Mild soap & water.

3 Clean IMMEDIATELY

Tree sap

Bird droppings

Salt spray

Insects

Tar

Oils

\+ And any **other residue** as soon as you notice it.

These substances can damage the film if left on the surface — wipe them off as soon as possible.

4 Precautions

Keep the following away from the windshield film to help prevent scratches, lifting, or heat damage.

- Sharp Objects
- Harsh Chemicals
- High-Pressure Water
- Hard Brushes
- Extreme Heat

NOTE When using a pressure washer, keep the nozzle **at least 3ft (1m) away from the film's surface.**
Avoid parking the vehicle in extreme heat for extended periods.

5 Wiper Care

- Always use washer fluid when using your wipers, to help prevent scratching the film.
- Wipe under the wiper blades with a microfiber cloth and washer fluid or ammonia-free glass cleaner to remove residue.
- We recommend replacing wipers every 6 months.

If You Notice These Signs

RECOMMENDED

- ✓ Get new wipers.
- ✓ Limit unnecessary wiper usage.
- ✓ Try switching to silicone wipers.
- ✓ Avoid using wipers on auto-mode.

6 If a Problem Occurs

✕ Do not **pull, cut, trim, remove,** or **attempt to reinstall** the film yourself.

NOTE If you notice **lifting along the film edges, discoloration, bubbles, or any other damage,** please contact an **ULTRAFIT Authorized Dealer immediately** for inspection.
